ANARBAEV URANBEK

DATA SCIENTIST

About Me

I'm a data scientist with a strong blend of business acumen and technical skills, refined through startup project experience. Known for my collaborative approach and sharp problem-solving abilities, I excel under pressure and quickly grasp complex challenges. I'm passionate about leveraging data analysis to enhance efficiency, drive profitability, and achieve strategic goals for organizations. I'm eager to contribute my skills to impactful projects that harness the power of data for tangible business benefits.

Experience

Startup "EverAbility" 2018-2020

Developer

- Utilized statistical analysis to extract meaningful insights and trends from the collected data, informing strategic business planning and business decisions, using Python Pandas, Numpy for analysis and visualization tools in R and Power BI
- Developed website online store using Django framework and Front-End tools

Freelance 2020 - 2021

Developer

- Developed Car Sharing Telegram Bot using Python, Django and MySQL database and WebApp applications with API integration
- Developed website online store with interactive design using Database tools such as MySQL, Django framework and JS tools

Certification

IBM Data Science Professional Certificate (2024)

Machine Learning with Python(2024)

Education

2020-2023

Technical School of Innovation AUCA

Program name: Startup Finance and High technologies (Data Science and finance)

2023-Current

Guilin University of Electronic Technology, Guangxi, China

Program name: Pre-University Program
